projects & demos

I work across the whole stack, from the screen people click on to the database behind it, and I build software that people actually use. I'm looking for an internship from early 2028.

01 experience

Odoo Developer · Leftech BV
Sep 2025 – Aug 2026

- Took a local family business with no IT at all online: set up Odoo for their entire stock and their website, as a stable environment to run the business on.

Python · Odoo

.NET Developer (intern) · Flagstone
Sep 2024 – Jun 2025

- Built the AI-powered FAQ chatbot widget (see projects), from the JavaScript front end to the .NET API and database.

Administrative Lead · AM Garage
2019 – now

- Administration, invoicing, planning and customer contact for the garage, alongside my studies.

All-round Employee (student job) · Smatch
Oct 2022 – Feb 2024

02 projects

garage-app
in use

- Phone and PC app for my father's garage: collects everything needed to invoice a car, from details to photos and voice memos.
- The Android app works fully offline and syncs in the background without duplicating data.
- A .NET 10 API with PostgreSQL runs in Docker on my own Ubuntu server, with mirrored disks (RAID 1).

Kotlin · Jetpack Compose · .NET 10 · PostgreSQL · Docker · Linux

faq-chatbot
internship · Flagstone

- A floating widget where visitors search frequently asked questions or ask an AI assistant.
- Plain JavaScript front end; an ASP.NET Core Web API serves the FAQ data from SQL Server and forwards questions to the OpenAI API.

C# · ASP.NET Core · EF Core · SQL Server · JavaScript · OpenAI API

03 reference

Jurgen Dekeyser · Founder & internship mentor, Flagstone
Contact details on request

04 education

Bachelor Multimedia & Creative Technology
Howest · Kortrijk
2026 – now
Heading for Next Web Developer: Azure, AI, Figma and IoT

Associate Degree in Programming
VIVES · Kortrijk
2022 – 2025
C#, .NET and web development

Office & Data Management (+ specialisation year)
Campus Hemelvaart · Waregem
2015 – 2022

05 skills

C# / .NET / ASP.NET Core & MVC
Python / Odoo
SQL Server / PostgreSQL / EF Core
Kotlin / Jetpack Compose
Docker / Linux (Ubuntu server)
HTML / CSS / JavaScript

06 languages

Dutch	fluent
English	fluent
Italian	fluent
